

Certificate of Supply Low Carbon Concrete

This Adbri sustainable product certificate certifies that the concrete mix supplied for the *Project Name* for *Customer Name* is Futurecrete® low carbon concrete.

This concrete mix has a Global Warming Potential (GWP-T) of XXX kilograms of CO₂ equivalent per cubic metre of concrete.

Futurecrete low carbon concrete product specification

- This concrete is compliant with the performance requirements of AS1379.
- The GWP number is verified through our concrete process EPD, which is compliant with EN 15804+A2:2019, module A1 – A3
- Supports the circular economy with demonstrated use of recycled materials (supplementary cementitious materials).

Use of this Futurecrete® concrete reduces the embodied carbon of concrete, compared to an equivalent normal class 25MPa concrete with no cement substitution.
